

Product Description:

The FlexiMega_WALL Outdoor – for tough conditions outdoors.
A sophisticated ventilation system, climate technology, a very robust design made in anodized aluminum and an extremely weatherproof surface coating ensure a perfect appearance whatever the weather.

The whole front door of the kiosk can open, giving easy access to the contents and additional components can be accommodated with ease - a very service friendly MegaOutdoor.

FlexiMegaOutdoor Walls are available in different sizes and colours, with or without touch screens. The standard colour is silver (anodized) with top, bottom and sides in black, and standard sizes are 40", 46" or 52".
